

## Dietary Policy 2023

Here at Green Bay we do our best to ensure that a wide selection of healthy food choices are available at each meal, ensuring each of our guests a comfortable dining experience. We work with fresh products first and make all attempts to choose the highest quality products from our trusted food suppliers.

We have the capacity to accommodate CELIAC, GLUTEN or DAIRY ALLERGIES or INTOLERANCES. Gluten-free or dairy-free options will be available to our guests: Summer campers can request this in their online registration process, and a rental group organizer can submit a dietary request form on behalf of their group a minimum of 2 weeks prior to their event. Our Food Services Manager is dedicated to contacting you and discussing your needs and answering questions prior to your arrival. Though we will always try, unfortunately late additions may not be able to be accommodated.

Vegetarians are welcome to choose from our many buffet selections available at the main buffet and at our salad station or bring supplementary foods that can be stored in the refrigerator in our dining hall and heated in a microwave at the self serve station. We are NOT able to accommodate VEGAN, KETO, PALEO or any choice diets however; welcome you to bring and store supplementary food in our dining hall refrigerator.

Our goal is to provide a safe and inclusive dining experience here at camp. We cannot guarantee a 100% Gluten Free facility for food preparation. In the kitchen we strive to high standards in limiting cross-contamination and are committed to providing guests with ingredient profiles upon request. Our facility does not cook with or serve foods containing nuts, and consider ourselves a NUT AWARE facility. We request that you please do not bring any food items on site containing such ingredients.

We look forward to having you on site here at Green Bay and invite you to contact our Food Services Manager with any questions regarding this policy.
